REVIEW ARTICLE

In vitro pollination and fertilisation in maize (*Zea mays* L.): technical procedures and prospects for the dissection of the double fertilisation process
J.E. Faure, C. Digonnet, R. Mol, E. Matthys-Rochon, C. Dumas (Lyon, France; Poznan, Poland) 1–10

PHYSIOLOGY AND BIOCHEMISTRY

Diurnal modulation of polyamine content in seedlings of *Lycopersicum esculentum* Mill.cv. Ace 55 by temperature and light
M. N'Doye, B. Millet, M. Paynot, J. Martin-Tanguy (Besancon, Dijon, France) 11–15

Evidence for the breakdown of cecropin B by proteinases in the intercellular fluid of peach leaves
D. Mills, F.A. Hammerschlag, R.O. Nordeen, L.D. Owens (Beltsville, MD) 17–22

Calmodulin-dependency of a Ca^{2+}-pump at the plasma membrane of cultured carrot cells
F. Kurosaki, H. Kaburaki (Toyama, Japan) 23–30

Respiration of bulb scale fragments of tulip after storage at 5°C
W.A. Kanneworff, L.H.W. van der Plas (Amsterdam, Wageningen, The Netherlands) 31–38

Synthesis and targeting of *Brassica napus* oleosin in transgenic tobacco
C. Batchelder, J.H.E. Ross, D.J. Murphy (Norwich, UK) 39–47

GENETICS AND MOLECULAR BIOLOGY

Expression of GUS and CAT activities using electrotransformed pollen
C.R. Smith, J.A. Saunders, S. Van Wert, J. Cheng, B.F. Matthews (Beltsville, MD) 49–58

Induction by methyl jasmonate of embryogenesis-related proteins and mRNAs in *Nicotiana plumbaginifolia*
C. Reinbothe, A. Tewes, J. Lehmann, B. Parthier, S. Reinbothe (Halle/Saale, Gatersleben, Germany; Zurich, Switzerland) 59–70

CELL AND TISSUE STUDIES IN VITRO

Effects of ethylene and ethylene inhibitors on white spruce somatic embryo maturation
L. Kong, E.C. Yeung (Alberta, Canada) 71–80

Transient expression of the *uidA* gene in pollen embryoids of wheat following microprojectile bombardment
T.A. Loeb, T.L. Reynolds (Charlotte, NC) 81–91

High frequncy direct shoot regeneration from corm axillary buds and rapid clonal propagation of taro, *Colocasia esculenta* var. *esculenta* (L.) Schott (Araceae)
R.C.O. Chng, C.-J. Goh (Singapore, Singapore) 93–100

Induction of embryogenesis in isolated microspores of tulip
R.W. van den Bulk, H.P.J. de Vries-van Hulten, J.B.M. Custers, J.J.M. Dons (Wageningen, The Netherlands) 101–111

Book reviews 113–115

PHYSIOLOGY AND BIOCHEMISTRY

Changes in lipid composition in tobacco cells treated with cryptogein, an elicitor from *Phytophthora cryptogea*
E. Tavernier, V. Stallaert, J.-P. Blein, A. Pugin (Dijon, France) 117–125

Characterization of catalase from the seaweed *Porphyra yezoensis*
T. Nakano, M. Watanabe, M. Sato, M. Takeuchi (Sendai, Japan) 127–133
Prior temperature exposure affects subsequent Cd-induced ethylene production in rice leaves
S.L. Chen, C.H. Kao (Taiwan, People's Republic of China) 135–138
Thiophene bioconversions in *Tagetes* protoplasts
J.J.M.R. Jacobs, M. Stalman, A.F. Croes, G.J. Wullems (Nijmegen, The Netherlands) 139–145
Ethanol metabolism by tobacco callus in vitro
Y.-S. Yang, D.-C. Chu, M. Aizawa, M. Kim, T. Yamomoto (Guangzhou, People's Republic of China; Yokkaiichi, Japan) 147–151
Effect of mannose on the plasma membrane ATPase from sugar beet (*Beta vulgaris* L.) leaves
C. Wilson, M.A. Madore (Riverside, CA) 153–160
Antioxidant enzymes and lipid peroxidation during aging of *Chrysanthemum morifolium* RAM petals
C.G. Bartoli, M. Simontacchi, J.J. Guiamet, E. Montaldi, S. Puntarulo (La Plata, and Buenos Aires, Argentina) 161–168
Alterations of the ethylene pathway in germinating thermoinhibited chick-pea seeds caused by the inhibition of polyamine biosynthesis
M. Gallardo, P. Muñoz de Rueda, A.J. Matilla, I.M. Sánchez-Calle (Granada, Spain) 169–175

GENETICS AND MOLECULAR BIOLOGY
Photosynthetic O_2 evolution in maize inbreds and their hybrids can be differentiated by open photoacoustic cell technique
W.J. da Silva, L.M. Prioli, A.C.N. Magalhães, A.C. Pereira, H. Vargas, A.M. Mansanares, N. Cella, L.C.M. Miranda, J. Alvarado-Gil (Campinas, Nova Friburgo, São José dos Campos, Brazil; Mexico, Mexico) 177–181

CELL AND TISSUE STUDIES IN VITRO
High efficiency *Agrobacterium*-mediated transformation and regeneration of citrus
L. Peña, M. Cervera, J. Juárez, C. Ortega, J.A. Pina, N. Durán-Vila, L. Navarro (Valencia, Spain) 183–191
Establishment of long-term embryogenic cultures of seedless *Vitis vinifera* cultivars — a synergistic effect of auxins and the role of abscisic acid
A. Perl, S. Saad, N. Sahar, D. Holland (Bet-Dagan, Israel) 193–200
Plasmolysis facilitates the accumulation of protein and DNA into extra-plasmalemma spaces of intact plant cells
F.-S. Wu, A.B. Cahoon (Richmond, VA) 201–214
Studies of gynogenesis in onion (*Allium cepa* L.): induction procedures and genetic analysis of regenerants
B. Bohanec, M. Jakše, A. Ihan, B. Javornik (Ljubljana, Slovenia) 215–224
Ni toxicity on carnation (*Dyanthus cariophyllus* L. cv. Corrida) cell cultures: selection of Ni tolerant lines and effects of Ca and Mg
R. Gabbrielli, P. Gori, A. Scala (Firenze, Italy) 225–230

Book review 231–232
